PKM

PARTIAL KNEE MEETING
HARROGATE // 2025

DAY ONE
THURSDAY
15TH MAY

10:00 Registration and Coffee

10:30 Welcome & Introduction

10:45 - 12:30 SESSION 1

Fixed-bearing Medial UKA – The state of the nation

Moderator: Nick London

10:45 Historical review

Paul Nicolai

11:00 Why UKA and why fixed?

Nick London

11:15 Surgeon volumes/UK usage/
NICE guidelines

Richard Parkinson

11:30 Personal series - 1,000 cases

Paul Nicolai

11:45 Questions & answers

Faculty panel

12:15 Industry recognition

12:30 Lunch break

13:10 - 14:10 SESSION 2

Indications and patient selection for Medial UKA

Moderator: David Duffy

13:10 Historical and contemporary
indications

David Duffy

13:20 Evidence to support use in: Young
and elderly; higher BMI, ACL
deficiency

Nick London

13:30 PFJ OA – ignore, combined
PFJ/medial UKA or TKA

Damian Bull

13:40 UKA in post-traumatic knee

Angela Brivio

13:50 Questions & answers

Faculty panel

14:10 INDUSTRY SESSIONS

PPK-Surgical Technique Pearls & Tips
(Zimmer Biomet)

David Duffy

Enovis – To cut or coach

Clare Pettigrew & Paul Nicolai

Johnson & Johnson – Enhancing
partial knee surgery: Insights on
Sigma partial implants and intuition
instruments

David Barrett & Rob Harvey

14:45 - 15:30 SESSION 3

Interactive case study discussion

Moderator: David Barrett

15:30 Coffee break

15:50 INDUSTRY SESSIONS

Same as above sessions

16:25 - 17:15 SESSION 4

Lateral UKA and PFJA

Moderator: Paul Nicolai

16:25 Indications and contemporary
outcomes lateral UKA

David Duffy

16:40 Indications and contemporary
outcomes PFJA

David Barrett

16:55 Questions & answers

Faculty panel

17:15 - 18:00 SESSION 5

Peri-operative discussion

Moderator: Mark Farndon

17:15 Daycase PKA

Richard Parkinson

17:30 Analgesia – nerve block (Adductor)

Jeremy Charlton

17:45 Cryotherapy

Guest

18:00 Conference close

19:30 Conference Dinner

La FERIA, Harrogate

PARTIAL KNEE MEETING
HARROGATE // 2025

DAY TWO
FRIDAY
16TH MAY

08:45 Summary of Day 1

09:00 – 10:30 SESSION 6

Surgical techniques for medial UKA

Moderator: Mark Farndon

09:00 Tips and tricks for Medial UKA

Angela Brivio

09:20 Re-live surgery - Medial

Nick London

09:40 Questions & answers

Faculty panel

10:00 INDUSTRY SESSIONS

PPK-Surgical Technique Pearls & Tips
(Zimmer Biomet)

David Duffy

Enovis – To cut or coach

Clare Pettigrew & Paul Nicolai

Johnson & Johnson – Enhancing
partial knee surgery: Insights on
Sigma partial implants and intuition
instruments

David Barrett & Rob Harvey

10:30 Coffee break

11:00 – 12:20 SESSION 7

Surgical techniques, tips and ticks for lateral
UKA and PFJA

Moderator: Nick London

11:00 Re-live surgery - Lateral UKA

Nick London

11:20 PFJA surgery and tips for success

David Barrett

11:40 Questions & answers

Faculty panel

12:20 Lunch break

13:20 – 14:30 SESSION 8

Short talks & panel discussion

Moderator: Damian Bull

13:20 Assistive technology debate

Nick London vs Mark Farndon

13:30 Bilateral: Sequential or simultaneous?

Paul Nicolai

13:40 Combined ACL/ UKA?

David Duffy

13:50 Questions & answers

Faculty panel

13:55 Bi-compartmental PKA or adding
another partial

David Barrett

14:05 Revision of a UKA

Damian Bull

14:15 Infections in UKA

Angela Brivio

14:25 Questions & answers

Faculty panel

14:30 – 15:00 SESSION 9

'Getting started' (or increasing utilisation)

Moderator: Richard Parkinson

14:30 First steps, training, visitations

David Barrett

14:40 Can a foot and ankle surgeon have a
successful UKA practice?

Mark Farndon

14:50 Developing a partial knee practice
under the spotlight of the NJR

David Duffy

15:00 Final questions & closing remarks

97.3%

PATIENT SATISFACTION^{1*}

At 2 year* follow-up in a multi-center study:

- **97.3% of patients were satisfied or very satisfied** with the results of surgery¹
- **100% of patients** reported their knee always felt “normal”¹

The Persona Partial Knee significantly decreased tibial overhang compared to some previous fixed bearing designs^{2,3}, reducing the risk of clinically relevant overhang, which can lead to severely compromised patient outcomes⁴

Persona[®]
PARTIAL KNEE

PERSONALIZED IMPLANTS. PRECISE INSTRUMENTATION. PROVEN TECHNOLOGY.

To learn more visit zimmerbiomet.com

* 108 of 110 subjects who have completed the two year study interval; 643 knees to day (3 infection revisions and one ORIF following periprosthetic tibia fracture).

1. Persona[®] Partial Knee Clinical Outcomes Study ANNUAL REPORT K.CR.I.G.16.16. Internal data on file at Zimmer Biomet. September 2019. 2. Bischoff JE, Argenson J-N, Della Valle CJ, Thienpont E. ORS Meeting. New Orleans, LA. 2018. 3. Escudier, MD, et al. *The Journal of Arthroplasty* July 2019. 2019. (106 patients; Persona Partial vs. ZUK, 1 year follow-up). 4. Chau, et al. *The Knee*, 16 (2009) 310-313.

 ZIMMER BIOMET

1 David Barrett

Professor David Barrett is a Consultant Orthopaedic Surgeon specialising in knee surgery. He practises at Southampton University Hospital, where he is also Professor of Orthopaedic engineering with a special interest in knee joint design. He also has clinics in the private sector at the Spire Hospital in Southampton and at the Wessex Nuffield. Professor David Barrett developed his interest in knee surgery following a knee fellowship at Harvard Medical School and subsequently returned to the Institute of Orthopaedics to hold a lecturer's position developing his research in knee joint design and function.

2 James Belsey

James is a clinical exercise scientist who was awarded a PhD in 2020 from the University of Winchester (UK) for his thesis around the use of graft materials during high tibial osteotomy and its implications for returning to physical activity. His current research focus is on the optimisation of cryocompression therapy for rehabilitation from knee surgery. James currently works as a Research Consultant for Physiobio Technologies Ltd and as a Visiting Lecturer at the University of Winchester, where he has delivered modules in undergraduate Sport & Exercise Science related to health, rehabilitation, and clinical populations.

3 Angela Brivio

I studied Medicine and Surgery at the University of Milan and partly in Strasbourg, where I discovered my passion for Orthopaedics and Traumatology. I specialised at the University of Milan, with a thesis on elbow fractures in children that I later published. I took my study to a three-year world congress (SICOT/SIROT) in Hong Kong in 2008. I dedicated the first years of my career to paediatric orthopaedics and traumatology as my interest in the knee grew. Thus, I started attending courses and congresses, as well as visiting the operating theatres of distinguished knee surgery colleagues in Italy and abroad.

4 Damian Bull

Mr Damian Bull is a consultant trauma and orthopaedic surgeon specialising in knee surgery. Prior to medical training, Mr Bull completed a degree in engineering and spent time working for a multinational engineering firm in Switzerland. His background in engineering naturally led to an interest in orthopaedic surgery. He gained his medical degree at the University of Newcastle upon Tyne and completed trauma and orthopaedic surgical training in the Yorkshire and Humber region. During his training, he also completed a national leadership and management fellowship.

5 Jeremy Charlton

Jeremy has been a consultant anaesthetist in Harrogate for over 20 years, and has a special interest in anaesthesia for knee surgery. He has a particular interest in post-operative care and post-operative analgesia for all types of knee surgery. In his spare time, he likes to collect Incan matrimonial head masks.

6 Dave Duffy

Dave is currently the lead surgeon for acute knee injuries at Harrogate District Hospital and has successfully treated many professional athletes. He has performed thousands of arthroscopic procedures (ACL reconstruction and meniscal surgery) throughout his career. His approach is directed at diagnosing the extent of a new injury quickly. Being able to start treatment early, especially for conditions where this is time critical, is essential to achieving the best result. The support of specialist physiotherapists, plus swift and high quality investigations help to achieve this goal.

7 Mark Farndon

Mark Farndon is a consultant orthopaedic surgeon with a busy NHS practice based in Harrogate, North Yorkshire. He is a specialist lower limb surgeon treating conditions of the knee, foot and ankle. He offers consultations and treatment for private patients at hospitals in Leeds and Harrogate.

8 Nick London

Nick London is an specialist knee surgeon with more than 20 years' experience in sports injuries, knee arthritis and knee replacement surgery. In 2018 he was appointed Visiting Professor to the Leeds Beckett University Carnegie School of Sport in recognition of his work with sports injuries. After graduating from Cambridge University and a training scheme in Yorkshire, he completed a one-year sports knee fellowship in Australia before becoming a consultant in 2000. He has set up and developed The Yorkshire Knee Clinic and is a founder member of the European Knee Society.

9 Paul Nicolai

Paul has been working as a consultant trauma and orthopaedic surgeon in Bury St Edmunds, Suffolk since September 2003. His main field of interest is knee surgery, in particular the treatment of knee cartilage disorders in patients of any age. His most commonly performed operations are keyhole surgery (arthroscopy), realignment operations (osteotomy) and knee replacement surgery (unicompartmental or partial, total and revision). He participates in a trauma rota dealing with emergency admissions (fractures, dislocations, infections).

10 Richard Parkinson

Richard is a Consultant Orthopaedic Surgeon at Wirral NHS Trust. He was appointed in 1994 and did overseas fellowships in Melbourne, Australia and Seattle, USA. His main specialist interest is in surgery of the knee.

He performs large numbers of knee replacements, both primary and revision. In 2010 he was voted as one of the top ten UK knee arthroplasty surgeons. He also does large numbers of knee arthroscopies and ligament reconstructions.
